Team ID	xxxxxx
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	yes
2	README / Setup Guide (instructions to run the project)	yes
3	requirements.txt / package.json / dependency file	yes
4	Database schema / seed files (if applicable)	yes
5	Environment configuration file (.env.example or similar)	yes
6	Deployed application URL (if hosted)	yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	yes
8	Dockerfile / Containerization config (if applicable)	yes
9	Test files and test results	yes
10	Demo video or walkthrough (if required)	yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
HDI-Prediction system
│
├── app.py
├── requirements.txt
├── clean_hdi.csv
├── README.md
│
├── model/
│   ├── hdi_model.pkl
│   └── label_encoder.pkl
│
├── history/
│   └── prediction_history.csv
│
├── static/
│   ├── css/
│   │   └── style.css
│   └── images/
│       └── background.jpg
│
├── templates/
│   ├── index.html
│   ├── login.html
│   ├── dashboard.html
│   ├── predict.html
│   ├── result.html
│   ├── history.html
│   └── about.html
│
```

```
└── screenshots/
    ├── home.png
    ├── login.png
    ├── dashboard.png
    ├── prediction.png
    └── result.png
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://hdi-prediction-model-9.onrender.com/
Login Credentials (Demo)	Username:harshitha password:harshi1410
Platform / Hosting Provider	Render
Repository Link	https://github.com/Harshithalingineni/A-Comprehensive-Measure-of-Well-Being
Demo Video Link	https://drive.google.com/file/d/1tROMrFgg6NgMH01p2CNT8H3AjmVufSn4/view?usp=drive_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Download or clone the project repository from GitHub.
2. Open the project folder in Visual Studio Code, PyCharm, or any Python IDE.
3. Install all required dependencies using the following command:
   pip install -r requirements.txt
4. Verify that all project files and folders are available, including:
   - templates/
   - static/
   - dataset/
   - model/
   - app.py
5. Start the Flask application by running:
   python app.py
6. Open a web browser and navigate to:
   http://127.0.0.1:5000
7. Log in using the demo credentials:
   Username: harshitha
   Password: harshi1410
8. Access the Dashboard and navigate to the Prediction page.
9. Enter the required HDI parameters:
   - Life Expectancy
   - Expected Years of Schooling
   - Mean Years of Schooling
   - Gross National Income (GNI) per Capita
10. Click the Predict button to generate the Human Development Index (HDI) category.
11. View prediction results and prediction history through the application interface.

Online Access
The application is also deployed online and can be accessed directly at:
https://hdi-prediction-model-9.onrender.com

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The prediction is based on predefined HDI classification logic and may not represent real-world data with complete accuracy.	Can be improved by integrating an advanced machine learning model trained on larger datasets
2	The application uses fixed demo login credentials and does not support user registration or password management.	Can be enhanced by integrating a secure database-based authentication system.
3	The free Render hosting service may take 30–60 seconds to wake up after inactivity.	Wait for the application to initialize or use a paid hosting plan for faster response times.
